## **POVERTY STATUS IN THE PAST**

2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Madera County, California					
	Total		Below poverty level		Percent below poverty level	
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	
Population for whom poverty status is determined	145,251	+/-448	32,043	+/-2,486	22.1%	
AGE						
Under 18 years	42,253	+/-175	13,543	+/-1,282	32.1%	
Under 5 years	11,583	+/-161	4,204	+/-496	36.3%	
5 to 17 years	30,670	+/-230	9,339	+/-984	30.4%	
Related children of householder under 18 years	42,140	+/-190	13,430	+/-1,273	31.9%	
18 to 64 years	83,840	+/-391	16,286	+/-1,329	19.4%	
18 to 34 years	33,624	+/-377	7,549	+/-823	22.5%	
35 to 64 years	50,216	+/-443	8,737	+/-856	17.4%	
60 years and over	27,025	+/-554	3,439	+/-501	12.7%	
65 years and over	19,158	+/-172	2,214	+/-381	11.6%	
SEX						
Male	71,635	+/-427	14,454	+/-1,400	20.2%	
Female	73,616	+/-452	17,589	+/-1,331	23.9%	
RACE AND HISPANIC OR LATINO ORIGIN						
White alone	117,961	+/-1,908	25,819	+/-2,547	21.9%	
Black or African American alone	3,467	+/-387	1,107	+/-504	31.9%	
American Indian and Alaska Native alone	2,182	+/-378	521	+/-196	23.9%	
Asian alone	2,870	+/-277	102	+/-113	3.6%	
Native Hawaiian and Other Pacific Islander alone	146	+/-88	0	+/-28	0.0%	
Some other race alone	13,687	+/-1,936	3,412	+/-1,006	24.9%	
Two or more races	4,938	+/-835	1,082	+/-451	21.9%	
Hispanic or Latino origin (of any race)	83,082	+/-293	23,471	+/-2,200	28.3%	
White alone, not Hispanic or Latino	52,215	+/-284	6,905	+/-1,089	13.2%	
EDUCATIONAL ATTAINMENT						
Population 25 years and over	88,224	+/-423	15,266	+/-1,187	17.3%	
Less than high school graduate	24,568	+/-1,037	6,259	+/-731	25.5%

Subject

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

## Explanation of Symbols:

- 1. An '\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
- 2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
  - 3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

Madera County,

- 4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
  - 6. An '\*\*\*\*\* entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.
