# KINGS & TULARE COUNTIES 2017 POINT IN TIME COUNT

August 2017

#### **ACKNOWLEDGEMENTS**

Considerable efforts and talents of many individuals helped to ensure the success of the Point in Time count in Kings and Tulare Counties. The Kings/Tulare Homeless Alliance would like to thank the U.S. Department of Housing and Urban Development and the cities of Hanford, Porterville, Tulare and Visalia who contributed funding for this project as well as all of the volunteers who administered the surveys, the service providers who supported this effort, and the survey respondents who shared their personal stories with us.

#### **Summary**

Each year, the Kings/Tulare Homeless Alliance (Alliance) conducts a Point in Time (PIT) count of the number of people experiencing homelessness within Kings and Tulare Counties. Information gathered through the PIT survey is used by the Alliance to better understand the issues associated with homelessness, including causes of homelessness, service needs of the homeless, the region's unmet housing needs, and trends over time of homelessness in the region.

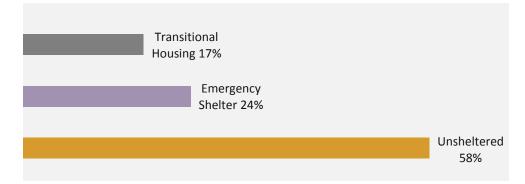

The 2017 PIT was held for the night of January 25, 2017. This one-day PIT survey provides a snapshot of the adults, children and unaccompanied youth living in Kings and Tulare Counties, who meet HUD's definition of homeless. It is important to note that the results of the count are influenced by a variety of factors such as weather, number of volunteers canvassing and the ability to locate and engage with people experiencing homelessness on the night of the count.

### **Key Findings**

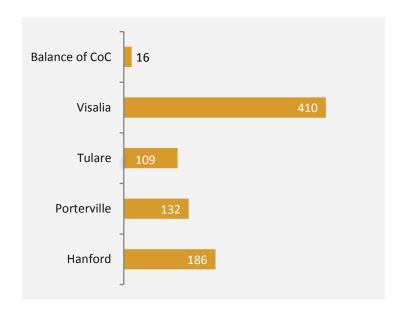

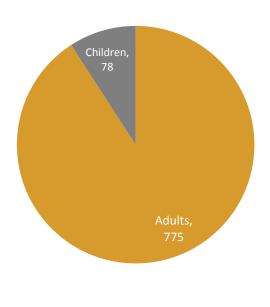

08/30/17 Page 8 of 84

TABLE 1. COUNT OF HOMELESS PERSONS BY COUNTY

County	Count	Percentage
Kings	187	22%
Tulare	666	78%
Total	853	100%

FIGURE 1. HOMELESS TREND 2009-2017

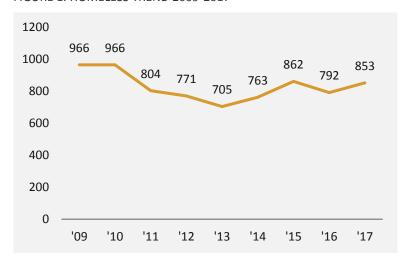

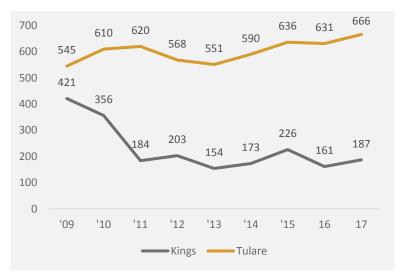

FIGURE 2. HOMELESS TREND BY COUNTY 2009-2017

#### **Trends**

Homelessness increased by 8% (853 in 2017 vs. 792 in 2016)

**Since 2009**, homelessness in Kings/Tulare has decreased by **12%** (853 vs. 966).

**Both** Kings and Tulare **Counties experienced an increase** in
homelessness **over prior year**.
Kings County has increased 16%,
while Tulare County increased 6%.

Visalia continues to be home to nearly half (48%) of the homeless population in Kings/Tulare Counties.

Hanford has the second largest concentration of homelessness (22%), followed by Porterville (15%) and Tulare (13%).

Total	354	41%	499	59%

FIGURE 3. HOUSING STATUS BY CITY

#### **Where People Slept**

#### Unsheltered

People with a primary nighttime residence that is a place not designed for or ordinarily used as a regular sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground.

#### **Sheltered**

People sleeping in a shelter designated to provide temporary housing to homeless persons. This includes emergency shelters and transitional housing programs.

Tulare has the largest percentage of their homeless population living in unsheltered situations (84%), followed by Hanford (67%) and Tulare (66%).

08/30/17 Page 10 of 84

#### Introduction

The PIT is a count of sheltered and unsheltered homeless persons on a single night in January. The U.S. Department of Housing and Urban Development (HUD) requires that a PIT count is conducted by every community receiving McKinney-Vento funding for homeless services. Annual counts include only those who meet HUD's definition of homelessness which include only those who are sleeping in in emergency shelters, transitional housing, safe havens or unsheltered situations on the night of the PIT count.

PIT Counts provide valuable information regarding the current state of homelessness in our community and nationally. The PIT also provides information on the extent to which homeless persons live with disabling conditions or belong to other subpopulations.

The findings in this report are estimates of how many people are homeless on a given night throughout Kings and Tulare Counties. The PIT Count in Kings and Tulare Counties identified 853 people experiencing homelessness on the night of January 25, 2017.

Data for the 2017 report were collected in the following three categories, as required by HUD:

#### 1. Households without Children.

Households without children consist of only adults age 18 or over. In this report, we also refer to households without children as "single adults" or "individuals." The vast majority of households without children are single persons, although this category may include couples without minor children or a parent and an adult child over the age of 18. These households are counted as single adults for purposes of the PIT Count.

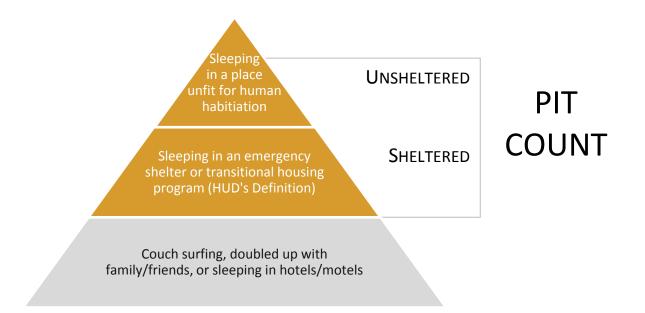

2. Households with Adults and Children. Households with adults and children contain at least one adult age 18 or over and at least one child under age 18. In this report, we also refer to households with adults and children as "homeless families."

#### 3. Households with Only Children.

Households with only children contain no adults age 18 or over, only persons under age 18, including teenage parents under 18 with at least one child, or other households with only persons under age 18. In this report, we also refer to households with only children as "unaccompanied youth (<18)."

Similar to past enumerations, the 2017 PIT count does not include persons who were couch surfing, precariously housed, or "doubled up". Per the federally-applicable definition of homelessness, persons who reported spending the night in a house or apartment, a permanent housing program, medical institution, or jail, were defined as housed.

08/30/17 Page 11 of 84

The data provided by the PIT survey is not an absolute measure of the extent of homelessness in Kings and Tulare Counties. Rather, it provides a representative sample and trends of homeless persons in the region. This enables the Alliance and other planning bodies to tailor the activities and calculate the unmet needs of people experiencing homelessness or at risk of becoming homeless.

The information provided by PIT is used not only to increase our understanding of the homelessness situation, but is also a tool to monitor progress and create achievable goals in our work to end homelessness, including:

- Assist local planning efforts by identifying unmet needs;
- Approximate the size of our homeless population and its characteristics;
- Increase awareness about homelessness issues,
- Provide an avenue to identify shifting needs and prioritize resources accordingly;
- Create targeted intervention for homeless sub-populations;

- Outline main community goals for the upcoming year;
- Define benchmarks for tracking and measuring progress on the reduction of homelessness; and
- Identify strategies that provide positive outcomes to decrease the incidence of homelessness.

The annual PIT survey count requires a significant amount of coordination from volunteers, agencies and the community at large. As such, the Alliance would like to extend gratitude to the survey team leaders, volunteers, sponsors, agencies, and survey participants that helped make the count a success.

08/30/17 Page 12 of 84

#### **Data Collection Methodology**

This study aims to gain an understanding of the number and trends of adults, children and unaccompanied youth living in Kings and Tulare Counties who meet HUD's definition of homeless. The PIT Count uses the HUD definition of homelessness in Federal regulation 24 CFR §578.3. Data are collected at both the individual and household level by utilizing two methods: the questionnaire and the HMIS (Homeless Management Information System) Database.

#### Questionnaire

Basic demographic and socio-economic information of individuals and households who are living in uninhabitable locations and of persons residing in shelters that do not actively enter information into HMIS was collected through administering a questionnaire (Appendix B). The survey instrument captured demographic information such as age, income, relationship to head of household and place of habitation, along with duration of homelessness, and reason for current episode of homelessness.

#### **HMIS Database**

The sheltered portion of the count is extracted from data in the region's Homeless Management Information System (HMIS). HMIS includes data on all persons who occupied an emergency voucher, shelter or transitional housing bed on the night of the count. This information is available from emergency shelters and transitional housing programs that actively enter client level data into HMIS. This includes all the same demographic and socioeconomic data fields captured by the questionnaire.

As of January 25, 2017 there were 35 programs in Kings and Tulare counties that actively enter data into HMIS. This represents 94% of the programs providing housing to the homeless population within the bi-county region.

#### **Communities Surveyed**

Table 1 provides a list of the twelve communities that participated in this year's survey. The communities not canvassed in the 2017 survey represented a total of 15 homeless persons in 2016. The communities that were added this year represent a total of 1 homeless person counted in 2017.

08/30/17 Page 13 of 84

#### Surveying

The PIT Count collected information on where homeless people slept on the night of January 25, 2017. It was held in conjunction with Project Homeless Connect (PHC) events held in Hanford, Porterville, Tulare and Visalia on January 26-27, 2017. As in prior years, combining the PHC and PIT events have led to a tremendous success in improved data quality and coverage.

In order to successfully complete the count, volunteers engaged in intake and assessment through PHC, street canvasing, meal site counts and residential surveys, while the HMIS method was implemented through residential emergency and transitional housing programs that actively enter data into the database.

**Service Count:** During the four PHC events, volunteers interviewed clients via an intake form to collect information on their homelessness and demographics. All intake volunteers were required to attend a specialized training session prior to their assignment at PHC.

Street Canvassing: The questionnaire took approximately 15 minutes to complete and was conducted in either English or Spanish. Teams of volunteers were sent out into the community to pre-assigned locations. In preparation to administer the questionnaire, a list of locations throughout the community where homeless persons congregate was created. The PIT committee mapped census areas based on cities and unincorporated areas of Kings and Tulare counties, highlighting "hot spots" (i.e. parks, soup kitchen, recycling centers, the river) within each region where the homeless are known to be.

Team leaders with experience in homeless census tracking were assigned to individual mapped regions. They were responsible for recruiting volunteers for their respective PIT team and were strongly encouraged to include homeless, formerly homeless and bilingual volunteers. All team leaders and volunteers were required to attend a mandatory training in preparation for the survey. When possible, canvass teams were partnered with service providers in order to disseminate information about existing programs and services at the same time.

Meal Site Count: Volunteers administered questionnaires at sites where free meals are served to the public. The meal site count is focused on identifying and interviewing people who are homeless, but did not utilize a shelter on the night of January 25, 2017.

Residential Surveys: Residential surveys utilized both research methods. For the emergency and transitional shelter programs that actively enter client information into HMIS, the database administrator extracted the necessary data fields from the system to provide reliable, comparable data for the PIT. Shelter programs who do not participate in HMIS were mailed information packets and questionnaires two weeks prior to the survey date to capture PIT information on their clients.

08/30/17 Page 14 of 84

#### **Limitations of the Study**

While the PIT count provides valuable information about homelessness in our community, it has some limitations which are important to keep in mind:

Variations in site participation: The PIT count relies heavily on the participation of social service organizations,

many of whom are stretched thin and have limited staff capacity. While every effort is made to ensure that all relevant organizations participate, there is inevitably some variation in the level and rate of participation of sites/ service providers from year to year.

Refusals to participate: Some respondents refuse to participate in the count because they want to preserve their privacy, don't trust service providers, or don't consider themselves homeless.

Difficulty finding people: It is widely acknowledged in all the research on homelessness that surveys undercount homeless populations. It is easy to "miss" homeless individuals and families -- they might not receive services at the agencies where homeless persons were counted on the night of the PIT Count, or if they do frequent a particular agency, they might not be there during the count. Youth on their own, recently homeless individuals and families who are doubled up with friends and relatives are often underrepresented among those who access homeless services.1

Unsheltered homeless people are particularly difficult to count. By definition, they are living on the street, in automobiles and other kinds

#### **Summary of Limitations**

- Variations in agency participation
- Count is a one-night estimate
- Client trust issues/refusal to participate
- Self-reported data may have reliability issues
- Unable to find people experiencing homelessness

of uninhabitable, temporary housing situations that limit the opportunity to complete the survey.<sup>2</sup> People enter and leave homelessness frequently and may become homeless shortly after the PIT Count. Furthermore, some individuals and families experiencing homelessness avoid accessing available services and try to hide from view. Even those who are not hiding are often difficult to locate. During the day, homeless camps are typically vacated and there is only a narrow window of time when campers can be located and questionnaires completed for the count.

Unaccompanied youth and children: As in years past, the Alliance experienced difficulty identifying homeless youth because they are not accessing services or frequenting typical homeless "hot spots"; do not appear homeless to enumerators; are more mobile throughout the day; and are more intermittently homeless.

08/30/17 Page 15 of 84

<sup>&</sup>lt;sup>1</sup> For example, "Number of Homeless Ohioans," Coalition on Homelessness and Housing in Ohio, 8/27/02; "Report on Homelessness in North Dakota, March 2005" (p. 15); S.J. Farrell and E.D. Reissing, "Picking Up the Challenge: Developing a Methodology to Enumerate and Assess the Needs of the Street Homeless Population, Evaluation Review, Vol. 28, No. 2, April 2004, pp. 144-155. <sup>2</sup> Ibid.

As explained by the United States Inter-Agency Council on Homelessness, "Due to barriers that exist for young people in accessing adult-only shelters and their lack of connection to most social services, many if not most youth experiencing homelessness go uncounted" (U.S. Interagency Council on Homelessness, 2012a).

Self-reported data: Self-reported data should not be viewed as an exact number. Individuals choose whether or not to answer these highly personal questions or to do so truthfully. Therefore, the numbers provided in this report are only reflective of those who chose to answer these questions.

#### Validity and Reliability

Validity and reliability of the quantitative methodology was endorsed throughout the process. The volunteers who conducted the questionnaire were required to complete a mandatory training and report to their experienced team lead. In order to avoid duplication, volunteers asked whether or not each person had already completed an interview. Furthermore, the survey instrument included each person's first and last initials as well as their year of birth. This information was used to create a unique identifier for each person for de-duplication purposes.

The database administrator ran multiple data quality tests to ensure the accuracy and completeness of the subpopulation data entered into HMIS and to ensure data quality of all completed questionnaires.

To calculate the region's bed need, all shelter programs within the region, regardless of participation in HMIS, completed the Bed Inventory and Occupancy Report. This was mailed out in a packet approximately two weeks prior to the date of the PIT survey. The database administrator followed HUD's guidance to calculate the community need.

The Bed Inventory and Occupancy Report includes information on the type of residential program (i.e. emergency, transitional), target population (i.e. single men, women with children), special target groups (i.e. domestic violence victims, substance abusers, veterans), existing bed capacity as of the night of January 25, 2017, newly created bed inventory since the last PIT, beds under development and occupancy information pertaining to the those in sheltered situations on the night of the PIT.

08/30/17 Page 16 of 84

#### **Survey Findings**

The 2017 PIT Count collected data on individuals and families experiencing homelessness on the night of Wednesday, January 25, 2017 in Kings and Tulare Counties. The Count identified 499 people who were sleeping in unsheltered situations and 354 people that were sleeping in an emergency shelter or transitional housing. In all, 853 people met HUD's definition of homelessness on the night of the count.

Tulare County represents the majority of homelessness within the bi-county region (78%). The number of homeless slightly increased in both counties in 2017. Tulare County experienced a 6% increase in homelessness (666 in 2017 vs. 631 in 2016), while Kings County rose by 16% (187 in 2017 vs. 161 in 2016).

FIGURE 1. HOMELESSNESS TREND BY COUNTY 2009-2017

According to the HUD's 2016 Annual Homeless Assessment Report, there were 549,928 people experiencing homelessness in the United States. This figure represents .18% of the nation's total population. Table 5 highlights the number of people experiencing homelessness counted during the PIT as a percentage of its total population in the bi-county region. Hanford (.34%), Porterville (.24%), and Visalia (.33%) greatly exceed the national average of .18%.

08/30/17 Page 17 of 84

FIGURE 2. HOMELESSNESS BY CITY 2012-2017

#### **Geographic Analysis**

Tulare County continues to be the home to the majority of people experiencing homelessness.

Hanford and Visalia have experienced an increase in homelessness over 2016.

Porterville has experienced a 25% decrease in homelessness (132 in 2017 vs. 177 in 2016).

The four largest cities in the bicounty region (Hanford, Porterville, Tulare, and Visalia) have experienced an increase in homelessness since 2012.

08/30/17 Page 18 of 84

TABLE 5. HOMELESS VS. TOTAL POPULATION

Jurisdiction	Total Population <sup>3</sup>	2017 Count	Homeless % of Total Population

National	308,745,538	569,928	.18%

FIGURE 3. MAP OF REGION SURVEYED FOR PIT COUNT

Hanford, Porterville and Visalia have a substantially higher homeless prevalence than the nationwide average of .18%.

Hanford increased from .28% 2016 to .34% in 2017.

**Porterville experienced a decrease** from .33% in 2016 to .24% in 2017.

The homeless prevalence in Tulare remained unchanged from 2016 to 2017 (.18%).

Visalia's homeless prevalence increased .26% in 2016 to .33% in 2017.

08/30/17 Page 19 of 84

<sup>&</sup>lt;sup>3</sup> 2010 Census results.

FIGURE 4. ADULTS AND CHILDREN

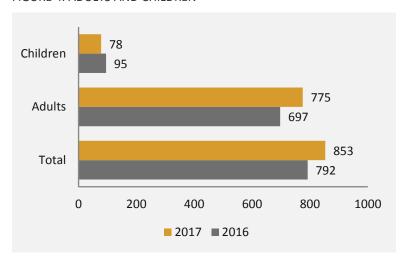

FIGURE 5. TRENDS BY CITY, ADULTS

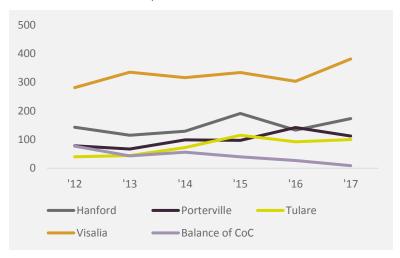

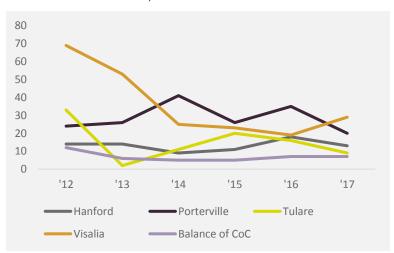

FIGURE 6. TRENDS BY CITY, CHILDREN

#### **Adults & Children**

775 (91%) were adults experiencing homelessness.

78 (9%) were children experiencing homelessness.

The number of children experiencing homelessness decreased in 2017 (78 in 2017 vs. 95 in 2016).

Despite the overall decrease in the number of children experiencing homelessness, the City of Visalia experienced an increase of 53% over 2016 (29 in 2017 vs. 19 in 2016).

08/30/17 Page 20 of 84

FIGURE 7. HOUSEHOLD COMPOSITION

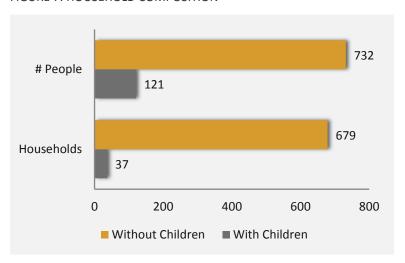

TABLE 6. HOUSEHOLD SIZE BY COUNTY

	# of	# of	Average
County	Households	People	Household Size
Kings	166	187	1.13
Tulare	550	666	1.21
Total	716	853	1.19

#### **Household Composition**

Over three-quarters (86%) of people experiencing homelessness are in single households or households without children.

In households with children, the average family size is 3.27.

The average household size is slightly higher in Tulare County (1.21) than in Kings County (1.13)

The number of households with children decreased in 2017 by 18% (37 in 2017 vs. 45 in 2018).

08/30/17 Page 21 of 84

White	711	83%
Multiple Races	26	3%
Unknown	10	1%

FIGURE 8. GENDER

#### **Race & Ethnicity**

The majority of homeless persons identified their ethnicity as Non-Hispanic/ Non-Latino (55%), unchanged from 2016.

Over three-quarters (83%) of respondents identify as White.

Native Hawaiian/Pacific Islanders (1%) and Asians (1%) continue to have a very low prevalence amongst the homeless population in Kings and Tulare Counties.

It is important to note that race classification is exclusive of ethnicity responses.

Males continue to represent the majority of homeless persons with 61% prevalence versus female (39%). These figures have remained consistent with results from prior years.

08/30/17 Page 22 of 84

FIGURE 9. CURRENT HOUSING

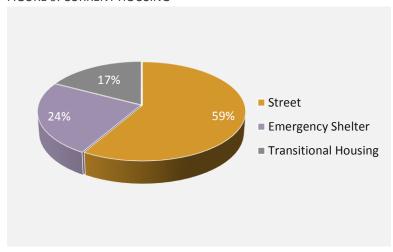

FIGURE 10. 2017 SHELTERED VS. UNSHELTERED, BY CITY

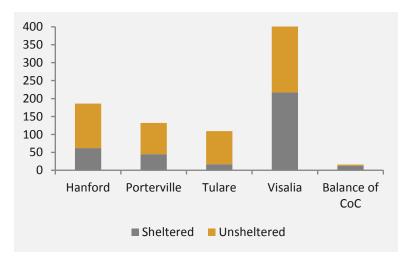

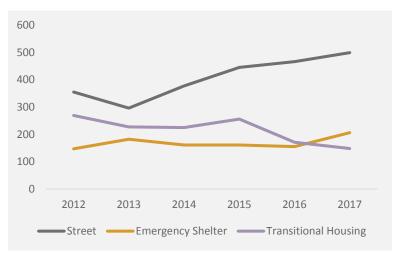

FIGURE 11. CURRENT HOUSING, TREND OVER TIME 2012-2017

#### **Current Housing**

**People** sleeping in an emergency shelters increased slightly from 2016 (206 in 2017 vs. 155 in 2016).

The number of people in transitional housing continues to decrease. There has been a 45% decrease since 2012 (148 in 2017 vs. 269 in 2012). This decrease is primarily due to the shifting of resources from Transitional Housing to Rapid Re-Housing.

People in **unsheltered** situations **continued the upward trend from prior years, with a 41% increase since 2012** (499 in 2017 vs. 355 in 2012).

08/30/17 Page 23 of 84

FIGURE 12. UNSHELTERED HOMELESS BY CITY

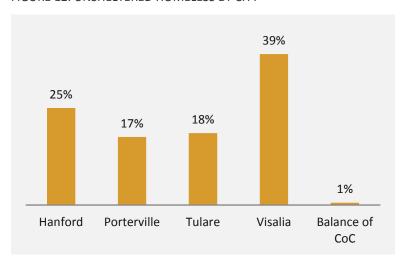

TABLE 9. UNSHELTERED HOMELESS PERSONS, 2016-2017

City	2017	2016	Actual Change	% Change
Hanford	124	100	+24	+24%
Porterville	87	124	-37	-30%
Tulare	92	79	+13	+16%
Visalia	193	144	+49	+34%
Balance of CoC	3	19	-16	-84%
Total	499	466	+33	+7%

#### **Unsheltered Homelessness**

**39% of unsheltered persons live in Visalia** (193), followed by Hanford (124 or 25%), Tulare (92 or 18%), and Porterville (87 or 17%). The remainder live in the remaining cities of the CoC (3 or 1%).

The largest increase over unsheltered homelessness in 2016 was Visalia with a 34% increase (193 in 2017 vs. 144 in 2016).

Porterville experienced a 30% decrease in unsheltered homelessness (87 in 2017 vs. 124 in 2016).

Nationally, 32% of the homeless population are sleeping in unsheltered situations. In Kings and Tulare Counties, the prevalence of unsheltered homelessness is 58%. (2016 AHAR)

There were **8 children** sleeping **in** unsheltered situations.

Over three-quarters (87%) of those sleeping in unsheltered situations reported a disabling condition.

08/30/17 Page 24 of 84

FIGURE 13. SHELTERED HOMELESS BY CITY

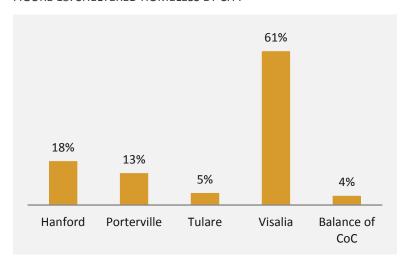

TABLE 10. SHELTERED HOMELESS PERSONS, 2016-2017

City	2017	2016	Actual Change	% Change
Hanford	62	51	+11	+22%
Porterville	45	53	-8	-15%
Tulare	17	29	-12	-41%
Visalia	217	178	+39	+22%
Balance of CoC	13	15	-2	-13%
Total	354	326	+28	+9%

#### **Sheltered Homelessness**

354 people (42%) were sleeping in sheltered locations.

Over half (61%) of the sheltered population live in Visalia, while only 5% live in Tulare.

The majority of families with children are in sheltered situations (86% or 32 households).

Average family size for households with children in sheltered situations is 3.28.

Both Hanford and Visalia experienced a 22% increase in the total number of people living in sheltered situations, while Tulare experienced a 41% decrease. The sheltered decrease in Tulare was due to the closing of a transitional housing program.

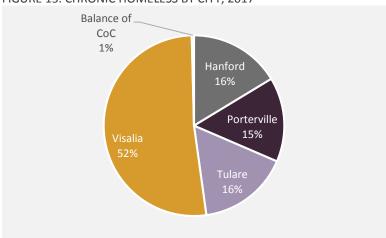

08/30/17 Page 25 of 84

FIGURE 14. CHRONIC HOMELESS TREND, 2012-2017

FIGURE 15. CHRONIC HOMELESS BY CITY, 2017

#### **Chronic Homelessness**

**29%** of people experiencing homelessness **meet the definition** of chronic homelessness.

There has been a **26% increase in chronic homelessness** since 2012 (251 in 2017 vs. 200 in 2012).

The average length of homelessness for a chronically homeless person in Kings and Tulare Counties is 4 years.

**Nearly all chronic homeless** persons **are** sleeping in **unsheltered** situations (92% or 231 persons).

Two-thirds of those experiencing chronic homelessness are males (65%).

**Tulare has** the **highest prevalence of chronic homelessness** in relation to their total homeless population (**38%**), followed by Visalia (32%), Porterville (29%), and Hanford (22%).

08/30/17 Page 26 of 84

FIGURE 16. HOMELESS VETERANS BY SHELTER TYPE

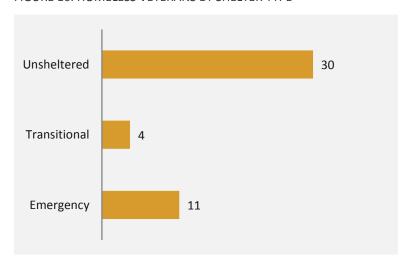

FIGURE 17. TRENDS BY HOUSING TYPE, VETERANS

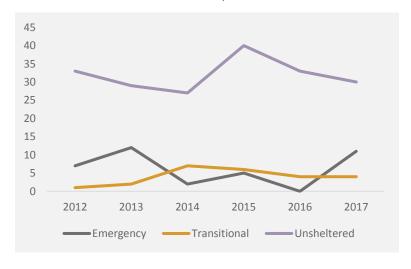

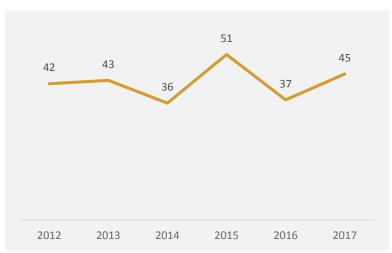

FIGURE 18. VETERAN TREND, 2012-2017

#### **Veterans**

Two-thirds (67%) of veterans experiencing homelessness are sleeping in unsheltered situations.

Over half (56%) of veterans experiencing homelessness live in Visalia.

Almost half (44%) of veterans experiencing homelessness in Kings and Tulare Counties are chronically homeless.

In comparison to the 2016 results, there was a sharp increase (22%) in the number of veterans experiencing homelessness.

From 2012 to 2017, the number of homeless veterans has remained relatively unchanged (45 in 2017 vs. 42 in 2012).

08/30/17 Page 27 of 84

FIGURE 19. VICTIMS OF DOMESTIC VIOLENCE BY HOUSING

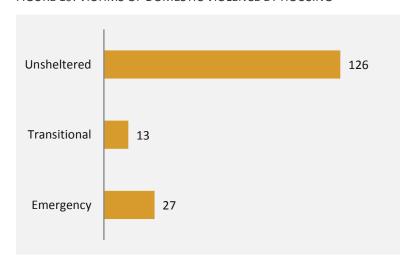

FIGURE 20. VICTIMS OF DOMESTIC VIOLENCE BY GENDER

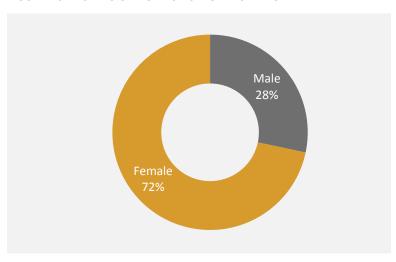

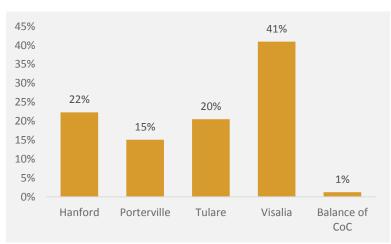

FIGURE 21. VICTIMS OF DOMESTIC VIOLENCE BY CITY

#### **Domestic Violence**

Almost three-quarters (72%) of victims of domestic violence experiencing homelessness are women.

A majority are living in unsheltered situations (76%).

Almost half (45%) are chronically homeless.

The number of **people** self **reporting domestic violence experiences has decreased** over the prior year **by 9%** (166 in 2017 vs. 183 in 2016).

The average length of time a victim of domestic violence experiences homelessness is an average of 2.8 years.

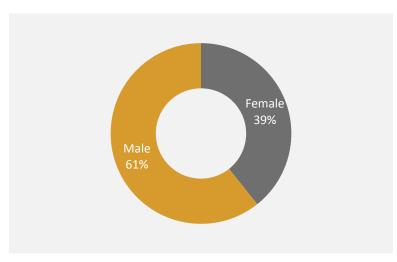

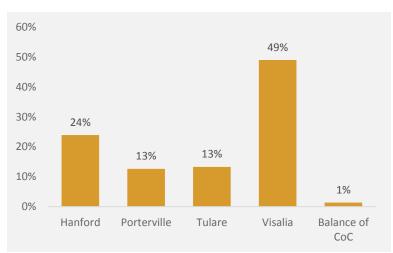

FIGURE 24. DISABLING CONDITION BY CITY

#### **Disabling Conditions**

Of the 700 adults who responded to the disabling condition questions, three-quarters indicated they suffer from a disabling condition (78%).

The number of people reporting a disabling condition rose dramatically in 2017 versus 2016 (603 in 2017 vs. 439 in 2016).

One—third of the respondents indicate they have a mental health condition (31%). This percentage is slightly reduced from the 2016 result of 33%.

Sheltered adults suffer from disabling conditions at a far lower rate (62%) than their unsheltered counterparts (87%).

Almost two-thirds (61%) of people experiencing homeless with a disabling condition are males.

08/30/17 Page 29 of 84

FIGURE 25. SOURCES OF INCOME

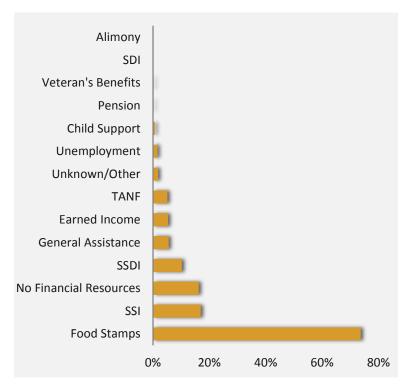

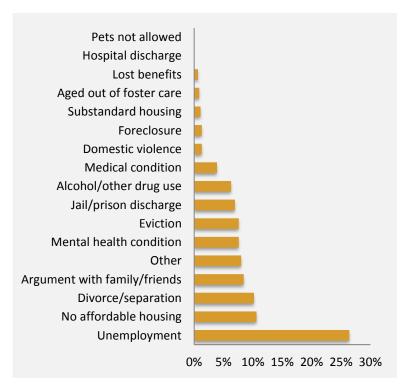

FIGURE 26. REASONS CITED FOR HOMELESSNESS

#### Sources of Income<sup>^</sup>

Of those responding to the income question, the highest percentage were receiving SSI (17%), followed by SSDI (10%), General Assistance (6%), Earned Income (5%), and TANF (5%).

Through community efforts such as SOAR, the number of homeless people receiving SSI/SSDI rose by 17% over 2016 (122 in 2017 vs. 104 in 2016). The 2017 number is more than twice that of 2015 (56).

#### **Reasons for Homelessness<sup>^</sup>**

Unemployment continues to be the most common reason cited for people experiencing unsheltered homelessness (26% or 122 adult respondents).

No affordable housing was the second highest reason given as reason for homelessness (11% or 49 adult respondents). This number is 69% higher than 2016 (49 in 2017 vs. 29 in 2016).

^Data only collected on unsheltered clients.

08/30/17 Page 30 of 84

FIGURE 27. HOMELESSNESS TREND BY COUNTY, 2009-2017

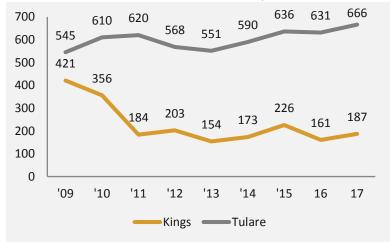

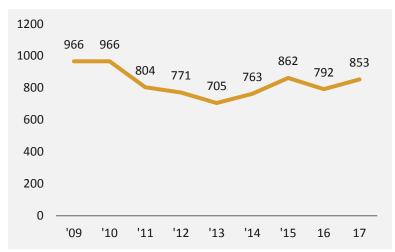

FIGURE 28. HOMELESSNESS TREND, 2009-2017

#### **Trend over Time**

Homelessness in Tulare County has risen by 121 people since 2009 or a 22% increase (666 in 2017 vs. 545 in 2009).

Kings County homelessness has decreased by 234 people since 2009, or a 56% reduction (187 in 2016 vs. 421 in 2009). However, homelessness has risen by 16% over the prior year (187 in 2017 vs. 161 in 2016).

Since 2009, the number of people experiencing homelessness in Kings and Tulare Counties has decreased by 12% (853 in 2017 vs. 966 in 2009).

On the night of January 25, 2017, there were 304 people residing in PSH & RRH beds that would have otherwise been counted as homeless.

08/30/17 Page 31 of 84

FIGURE 29. HOUSING INVENTORY, 2016-2017

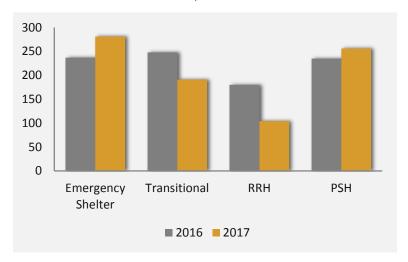

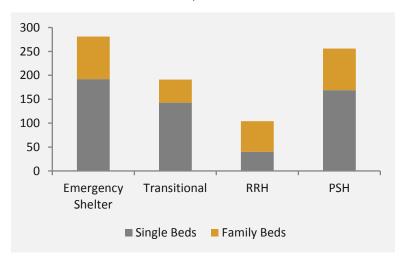

FIGURE 30. HOUSING INVENTORY, SINGLE VS FAMILY BEDS

# **Bed Capacity and Unmet Needs**

On the night of the PIT, the bicounty region had 256 Permanent Supportive Housing (PSH) beds and 104 Rapid Re-Housing (RRH) beds available to serve people experiencing homelessness.

Many of the housing programs are restricted to certain sub-populations such as victims of domestic violence, transition-age youth, veterans, or chronically homeless.

The development of additional Permanent Supportive Housing and Rapid Re-Housing beds continue to remain a top priority for program development in the region.

08/30/17 Page 32 of 84

#### **Looking Ahead**

Together with its partners, the Alliance has undertaken a number of targeted strategies to combat homelessness within the region and maximize the limited resources available.

#### Efforts include:

- A strong focus on permanent supportive housing and rapid re-housing that are reduce barriers to program entry;
- Use of the Vulnerability Index and Service Prioritization Decision Assessment Tool (VI-SPDAT). The VI-SPDAT
  is a national best practice that allows homeless service providers to similarly assess and prioritize the people
  experiencing homelessness in the community and identify who to treat first based on the acuity of their
  needs;
- Utilizing the local coordinated entry system, which enables all service providers to place clients off of a centralized priority list;
- Hosting monthly case management roundtables to staff cases, share best practices, and strategize on housing placements; and
- Coordinating the annual HUD CoC Program and HCD ESG applications for homeless funding in order to assist local agencies in accessing much needed funds for serving homeless persons in the region.

For more information on how to get involved, visit www.kthomelessalliance.org.

08/30/17 Page 33 of 84

#### **Appendix A - Definitions**

#### **Child Only Households**

Households where are members are under the age of 18.

#### **Chronically Homeless (CH)**

Individual or head of household with a disability who lives in a place not meant for human habitation, a safe haven, or in an emergency shelter; and who has either been continuously homeless for at least 12 months or has experienced at least four episodes of homelessness in the last 3 years where the combined occasions total at least 12 months. Occasions are separated by a break of at least seven nights. Stays in institutions of fewer than 90 days do not constitute a break.

#### **Continuum of Care**

Local planning body responsible for coordinating the full range of homelessness services in a geographic area, which may cover a city, county, metropolitan area, or even an entire state.

#### **Couch Surfing**

Describes situations where runaway or homeless youth are living in unstable and/or temporary living arrangements such as the couches or spare bedrooms of friends, lovers, or other family members<sup>4</sup>.

#### **Disabling Condition**

Any one of (1) a disability as defined in Section 223 of the Social Security Act; (2) a physical, mental, or emotional impairment which is (a) expected to be of long-continued and indefinite duration, (b) substantially impedes an individual's ability to live independently, and (c) of a nature that such ability could be improved by more suitable housing conditions; (3) a developmental disability as defined in Section 102 of the Developmental Disabilities

Assistance and Bill of Rights Act; (4) the disease of acquired immunodeficiency syndrome or any conditions arising from the etiological agency for acquired immunodeficiency syndrome; or (5) a diagnosable substance abuse disorder.

#### **Emergency Shelter**

A facility with the primary purpose of providing temporary shelter for homeless people.

#### **Homeless Person**

An individual or family who lacks a fixed, regular, and adequate nighttime residence and seek shelter in places not meant for habitation such as cars, camps, streets and abandoned buildings. Public or privately operated congregate emergency shelters are also places that house persons and families who are experiencing a housing crisis.

## Homeless Management Information System (HMIS)

A software application designed to record and store client-level information on the characteristics and service needs of homeless people. Each CoC maintains its own HMIS, which can be tailored to meet local needs, but must also conform to HUD's HMIS Data and Technical Standards.

#### **Households with Adults and Children**

People who are homeless as part of households that have at least one adult and one child under the age of 18.

#### **Households with Adults Only**

Households with single adults and adult couples unaccompanied by children under the age of 18.

08/30/17 Page 34 of 84

<sup>&</sup>lt;sup>4</sup> National Resource Center on Domestic Violence, 2009

#### **Housing Inventory Chart (HIC)**

A report on the capacity to house persons who are homeless.

#### **Parenting Youth**

Youth (under age 25) who identify as the parent or legal guardian of one or more children who are present with or sleeping in the same place as that youth parent.

#### **Permanent Supportive Housing (PSH)**

Designed to provide housing and supportive services on a long-term basis to formerly homeless people that have a disabling condition.

#### **Point in Time Count (PIT)**

An unduplicated one-night estimate of both sheltered and unsheltered homeless populations.

#### Rapid Re-Housing (RRH)

A program that provides financial assistance and services to help those experiencing homelessness to be quickly re-housed and stabilized. This is considered permanent housing.

#### **Sheltered Homeless People**

People who are living in a supervised publicly or privately operated shelter designated to provide temporary living arrangements (including congregate shelters, transitional housing, and hotels and motels paid for by charitable organizations or by federal, state, or local government programs for low-income individuals.)

#### **Transitional Housing (TH)**

A program that provides temporary housing and supportive services for up to 24 months with the intent for the person to move towards permanent housing.

#### **Unaccompanied Youth**

People who are not part of a family during their episode of homelessness and who are between the ages of 18 and 24.

#### **Unsheltered Homeless People**

People with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings.

#### Veteran

Someone who has served on active duty in the Armed Forces of the United States.

#### **Victims of Domestic Violence**

This subpopulation category includes persons who have been victims of domestic violence at any point in the past.

#### **CLIENT INFORMED CONSENT/RELEASE OF INFORMATION AUTHORIZATION**

When you request or receive services from a participating agency, we collect information about you and your household and enter it into a database system called the Homeless Management Information System (HMIS). This system helps us to better understand homelessness, to improve service delivery, and to evaluate the effectiveness of services provided to the homeless and those at-risk of homelessness.

#### What information is collected and what happens to it?

Depending on your situation, you may be asked:

- Basic identifying information (may include name, SSN, date of birth, gender, race, marital and family status, household relationships, phone numbers, military veteran status, whether or not you have a disability)
- Housing information (may include address, type of housing, homeless status, and reason for homelessness)
- Income information (sources and amounts of household income, employment information, work skills)
- o Legal history/information
- o Medical information
- o Services needed and provided; outcomes of services

- Details of your medical/health status will never be shared between Partner Agencies using HMIS, without written consent.
- o With your approval, information collected is shared with authorized personnel at Partner Agencies.
- Collectively, data on the homeless population in Kings and Tulare counties (but not personal identifying information) is used in statewide reports on homelessness.

NOTE: HMIS uses many security protections to ensure confidentiality and only Partner Agencies who have signed an Interagency Network Data Sharing Agreement have access. A list of Partner Agencies can be found on our website at www.kingstularecoc.org.

#### Why should you agree to have your information shared with HMIS Partner Agencies?

By sharing your information with these agencies, you will help them:

- o Identify other services or programs you may be eligible for,
- Better coordinate services for you and your household,
- More accurately count the number of homeless persons, services available and services needed,
- Show the people who fund homeless programs that the services are needed and
- Obtain other funding for programs that serve homeless persons.

You have the option to restrict access to personal information that you are providing about yourself and your minor children. You may modify this consent with respect to the sharing of your information at any time.

☐ Please treat information about my ch	ildren age 17 or younger the same as mine.	
This consent will expire seven (7) years fr cancellation will not be retroactive.	om the date signed. You may cancel this authorize	ation at any time by written request, but the
